

The Future of Speech Recognition — Available Now, Exclusively for Macintosh.

Welcome to MacSpeech Dictate, the brand new, premier speech recognition solution for Macintosh. Written from the ground up for the Mac, MacSpeech Dictate's features, accuracy, and capabilities make it as fun, productive, and intuitive as the Mac itself.

Amazing Accuracy

MacSpeech Dictate will astonish you with its accuracy. Simply talk and leave the rest to us. It hardly ever makes a mistake.

Minimal Training Required

You'll be dictating in 5 minutes or less with MacSpeech Dictate's fast training.

Uses The Legendary Dragon Engine

At the core of MacSpeech Dictate is the world's best speech recognition engine from Nuance Communications. It is why it provides such phenomenal accuracy.

No Hidden Costs

MacSpeech Dictate includes everything you need to be instantly productive. We even include a high quality, noise-canceling microphone.

Essential Command Capabilities

Instead of selecting menus and typing keyboard shortcuts, just speak a command. MacSpeech Dictate does it for you. What could be easier?

Works With Your Applications

Microsoft Office, QuarkXpress, Mail, — even Adobe Photoshop... MacSpeech Dictate works with them all. It works great with Apple's "iApps" too, including iWork, iChat, iPhoto, iWeb, and more. In fact, MacSpeech Dictate will work with just about any application out there.

Built Especially For The Mac

Mac users expect the best from their applications. MacSpeech Dictate was built from the ground up to ensure the ultimate Macintosh experience.

Just How Good Is MacSpeech Dictate?

It's so good editors of *Macworld* magazine and *Macsimum News* gave it **Best of Show** at Macworld Expo in January 2008. New York Times columnist David Pogue said "*MacSpeech Dictate is fast and accurate, pouring correctly transcribed text into any program where you ordinarily type, as fast as you can speak.*"

It's so good that attendees at Macworld Expo were getting above 95% accuracy with absolutely no training. That was on a noisy trade show floor — just imagine how good it will be for you!

The speech recognition program of the future is available today. Awarded **Best of Show** at the January 2008 Macworld Expo by both *Macworld Magazine* and *Macsim News*, MacSpeech Dictate brings advanced speech recognition to your Mac!

MacSpeech Dictate types directly into thousands of Macintosh applications, or into its own built-in Note Pad.

MacSpeech Dictate works with the programs you use every day: email, browsers, word processors, graphics applications, spreadsheets, and many more. Anywhere you use your keyboard, you can probably use MacSpeech Dictate.

MacSpeech Dictate also offers full Command & Control of your Mac. Open applications, cut & paste, and even surf the web using only your voice.

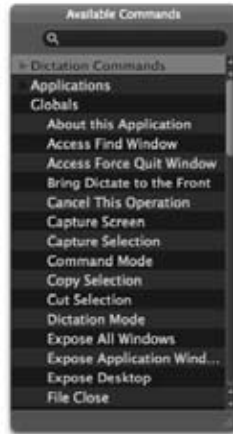

Work smarter, not harder. Use your voice to launch any application on your hard drive and the web sites you visit most frequently.

Create text macros of up to 8 pages of text to take the drudgery out of typing. You can even use MacSpeech Dictate's built-in AppleScript editor to perform complex or repetitive tasks with just one spoken phrase!

Available at the finest software resellers.

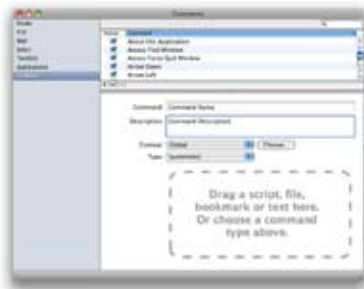

With MacSpeech Dictate, you can use your voice instead of your keyboard for just about anything.

MacSpeech Dictate's Available Commands window interacts with you to show which commands can be spoken. MacSpeech Dictate even lets you press on-screen buttons and surf the web with your voice!

Fast Training. In less than 5 minutes you will be dictating with incredible accuracy!

Drag and Drop to Create Commands. Creating new commands in MacSpeech Dictate is as simple as dragging and dropping.

Drag any icon on your hard drive and it immediately becomes available to be opened with a single spoken command. Drag a bookmark then say the name of the web site to jump right to it. Discover productivity you never thought possible by harnessing the power of your voice through MacSpeech Dictate.

Macintosh and AppleScript are registered trademarks of Apple Computer. Dragon NaturallySpeaking is a trademark of Nuance Communications, Inc. All other products mentioned are trademarks of their respective companies. System Requirements: Mac OS X 10.4.11 or higher (Mac OS X 10.5 or greater recommended). Intel Processor, (upgrade cards are not supported). 1GB RAM or more required. 2GB Hard Drive space. MacSpeech certified microphone required.
